- Create personalized and private areas for suppliers, consultants, co-contractors or technological partners

Extranet for Clients

Personalised WebTops for your customers:

- Add value to your offer by creating personalized portals for each customer
- Decrease paper administration
- Improve customer loyalty

What is a Corporate Portal Server

My Dashboard

A Portal architecture brings together in simple and personalized web views all the information and productivity tools relevant to the user. Portals have emerged as the most effective platform to rapidly develop and deploy corporate Internet, Extranets and Intranets web sites. They are today commonly considered as being the future front-end web system for the whole enterprise information system.

It is a smooth evolution from the first intranets featuring simple search tools to more complete solutions that include personalization, Web application support, content management features, content syndication, legacy system integration, access to remote Web Services, productivity and collaborative tools, all of which are accessible through a simple Web interface.

Web Publishing

Create pages, sub-pages, add text, images, applications... without any technological knowledge.

Dynamic Site

Manage your site on-line. Move or copy whole sections with a few mouse clicks. Modifications are automatically updated on the whole site.

Productivity and Communication Web Applications

Improve your productivity by sharing contacts, professional calendars, folders, documents... with built-in application tools.

Search Engine

Performs a global search on the whole portal content.

The screenshot shows a corporate intranet portal for 'POLAR'. The browser title is 'Intranet : Productivity tools - Microsoft Internet Explorer'. The page has a blue header with the 'POLAR' logo and navigation tabs for 'UPDATE STATUS', 'UPDATE NEWS', 'UPDATE TOOLS', 'UPDATE DOCUMENTS', and 'UPDATE INFORMATION'. Below the header, there's a user profile for 'USER : administrator' and a 'MyPages' section with links for 'Company', 'Department', 'Workspaces', and 'MyPages'. The main content area is titled 'Productivity Tools' and includes sections for 'Engine' (with a car image), 'Security', and 'Archives'. The 'Archives' section contains a table of tasks with columns for 'Title', 'Date', and 'Pr.'. Other sections include 'Frequently Asked Questions' and 'Modifications Request'.

Title	Date	Pr.
Engine design	31-07-2001 00:40	1
Lateral strengthen bars	12-07-2001 00:40	1
Gathering place adapt	11-07-2001 00:40	3
Oil filter insertion	21-07-2001 00:40	3
European size research	21-07-2001 00:40	5
Security systems	31-08-2001 00:40	3
Airbags	31-08-2001 00:40	4
Adapt explosion charge	15-07-2001 00:40	3
Lateral security bars	31-08-2001 00:40	4
Corrosion test	15-08-2001 00:40	5

One click Switch mode

A single button allows you to switch from the Edit mode to the View mode: your changes appear automatically.

Full Personalization

Each section of your site can be personalized and have its own set of graphical templates.

Rule based Security Management

Every page, every section of the site is accessible according to rights and rules defined by the administrator.

Web Services

Access from your Corporate Portal to hundreds of external Web Services such as NewsFeeds, Stock Tickers, Travel Booking.

JAHIA in 6 points

1

Built-in Web Publishing functions

A Web Site, an Intranet, an Extranet up and running in a few clicks. Define your site map, define page names, add text, insert images, install applications: your business solution is ready!

2

Web Site Management Tools

At your disposal, simple modules to add or remove users and groups, manage rights on pages and rules on applications. Furthermore the solution has a built-in search engine function.

3

Support for Web Applications and Web Services

Embed in your site web applications and web services without coding. Simply select the software component you want to add to your page and that's it.

4

Full web based administration

Everything is managed within the browser: templates, database settings, applications, users, passwords...

5

Complete customization

Every partner, employee, project manager... accesses his key data and tools through customized views. Moreover the full solution can be fully adjusted to your graphical requirements.

6

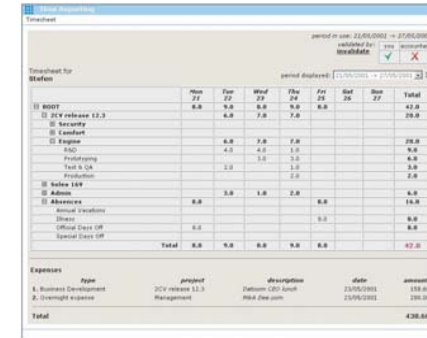

Marketplace of additional software components

You can download additional web applications on www.jahia.org. As Jahia natively supports standardized Java based Web Applications, you may also buy 3rd party components and use them directly into your portal.

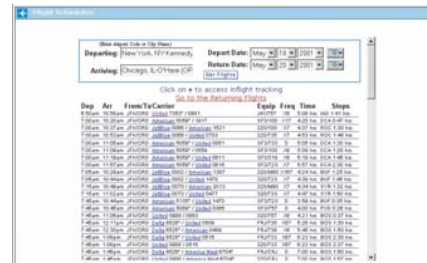

Web Views

These Web applications create web links or web views to other existing software applications installed on your servers. This may be applications such as MS Outlook Web interface, or views that connect to your existing legacy ERP or CRM systems.

Autonomous Web Applications

These stand-alone Web Applications have everything they need embedded into their own package (business logic; layouts; database connections;...) and do not rely on other external systems. Typical autonomous Web Applications are tools like a Time and Expenses tracker, a ToDo list or a Discussion forum.

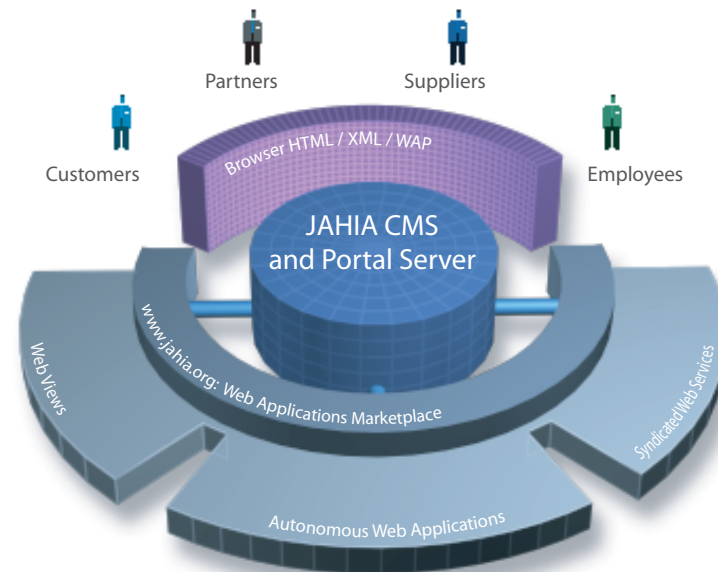

Services, Integration and Support

A complete set of planning, design, implementation, training and maintenance services for building a successful Corporate Portal are provided by Jahia Authorized Partners. These experts ensure that Jahia customers managing their web portal projects achieve their intended business objectives and ROI.

These professionals are composed of business, creativity and technology consultants with extensive experience in the design and implementation of Portal applications deployed on the Web.

Furthermore, we are strongly convinced that support is a crucial aspect of the customer experience using our products. To make sure that you are experiencing the best of our products and of our technology for the benefit of your company, partners also offer custom support contract.

Please contact an authorized Jahia partner to get more information about his range of professional services - www.jahia.org/partners
